PROFILE

Results-driven Data Scientist with 5+ years of hands-on experience in data analysis, predictive modeling, and end-to-end machine learning pipelines. Proficient in Python, PySpark, SQL, and statistical modeling, with a proven track record of driving impactful business decisions through data-driven insights. Adept at deploying scalable solutions using Microsoft Azure and implementing MLOps best practices to ensure efficiency and reliability. Expertise in Machine Learning and AI-based solutions. Proven ability to collaborate with cross-functional teams to deliver innovative data-driven outcomes.

TECHNICAL SKILLS

Languages: Python, PySpark, R, SQL

Quantitative Methods: Regression, Statistical Modeling, Classification, Clustering, Segmentation, Feature Engineering

Cloud Computing: Microsoft Azure (Azure Databricks, Azure Data Factory, MLOps, Feature Store)

Frameworks and Tools: Scikit-learn, TensorFlow, power bi, Git, CI/CD Pipelines

Developer Tools: Jupyter, Visual Studio Code, GitHub, R Studio

PROFESSIONAL EXPERIENCE

Data Scientist, Tiger Analytics

Jul 2023 – present | Chennai, India

- Designed and developed a **Scenario Planner** leveraging **Lasso Regression** and **Bayesian Regression** to evaluate the impact of pricing and promotions on sales. Incorporated advanced **feature engineering** and **log transformations** to enhance prediction accuracy. Led a team of junior data scientists, mentoring them in feature engineering, model evaluation, and cloud deployments.
- Collaborated with stakeholders to create models assessing trade promotion effectiveness, delivering actionable insights that improved ROI by 20% and increased revenue by 5%.
- Automated workflows to streamline data pre processing, scenario simulations, and performance tracking, enabling scalability and reducing manual intervention. Debugged Azure Databricks workflows by optimizing Spark jobs, reducing processing time by 30%.
- Provided data-driven recommendations that supported strategic decision-making, optimizing promotion calendars and targeting efforts for future campaigns.
- Developed advanced visualizations in Power BI and web-based tools to enhance stakeholder decision-making by integrating business constraints like budgets and inventory limits, enabling actionable and feasible optimization strategies.

Senior Data Analyst, Tiger Analytics

Jul 2021 – Jul 2023 | Chennai, India

- Designed and deployed a **global SKU Health Assessment Tool**, leveraging internal and external data to evaluate SKU profitability, sales growth potential, and overall health.
- Automated manual processes for **quarterly portfolio reviews** using metrics like **NSV** and **MAC**, enabling faster and more accurate decision-making.
- Developed a **data-driven similarity index** to analyze the impact of SKU eliminations, estimating **redistribution effects** and **demand transference** with precision.
- Leveraged advanced statistical methods (e.g., clustering, regression) and tools like **Python**, **SQL**, **Azure Databricks**, and **Power BI** to deliver actionable insights for portfolio optimization.
- Improved SKU portfolio performance by **15%**, reducing operational complexity by **20%** and enhancing focus on **high-scale, low-margin SKUs** for profitability and sales growth.

Data Analyst, Tiger Analytics

Jul 2020 – Jul 2021 | Chennai, India

- Analyzed paid search campaigns for CPG products, evaluating true ROAS and identifying opportunities to improve keyword strategies and bid values. Recommendations increased incremental sales by **10%** and enhanced search rankings.
- Developed a predictive modeling solution using **Lasso**, **Bayesian Regression**, and **Linear Mixed Effect Modeling** to measure the effectiveness of digital activations, incorporating **POS data**, **activation spend**, and **media tracking**.
- Designed a **Scenario Planner & Optimizer** to recommend activation strategies that maximize ROI and lift, resulting in a **2.6x improvement in ROAS**.

Data Science Intern, Tiger Analytics

Jan 2020 – Jul 2020 | Chennai, India

- Built a feature store in the Azure environment to centralize reusable data processing workflows. This enhanced efficiency for multiple solutions, reducing model development time by **25%**.
- Supported an end-to-end analysis of CPG sales data, identifying opportunities for growth. Prepared dashboards to monitor key performance metrics and recommended actions to maximize sales

EDUCATION

Vellore Institute of Technology

Jul 2016 – Jul 2020 | Vellore, India

Bachelor of Technology, Electronics and Communication Engineering, **CGPA - 8.59**

Bhashyam Junior College

Jun 2014 – Jul 2016 | Guntur, India

Intermediate, **PERCENTAGE - 98.1%**
