

# Sameer Kumar Panda

Software Engineer and ML Enthusiast

📞 +91 9102292779 ✉ sameerpandausa@gmail.com 🏠 Hyderabad, India

🌐 sameer kumar panda 🐙 Github 📄 Leetcode 📄 Certificates

## Areas of Expertise

Backend - Data analysis - Microservices - Data Structure and algorithm - Cloud Computing - Model Building - System Designing - Object Oriented Programming(OOPS) - DataBase Management

## Skills

Java - Python - Azure - Django - Fast api - My Sql - NoSql (Mongo Db) - Linux - Git/Github - Flask - kite - Redis - Model Fine Tuning - Vector DB - Langchain

## Professional Experience

**Associate Data Scientist** (*Tiger Analytics*) **Hyderabad, India** 10/2023 - present

- **Integrated Cloud Computing on Azure:** Enhanced client projects by incorporating Azure cloud services, significantly improving scalability and performance.
- **Major Code Refactoring:** Implemented substantial code changes to meet client requirements, optimizing logic and boosting efficiency by 70% through enhanced data handling.
- **Feature Expansion:** Added three new features to the existing codebase, addressing emerging market needs and increasing tool usage by 32%.
- **CI/CD Pipeline Creation:** Developed and deployed a CI/CD pipeline to automate workflows.
- **Automate the Checks and Modeling process:** Developed and deployed a pipeline to automate End to end Checks and validation processes, resulting in a reduction of 4 resources manual effort and increased deployment efficiency.
- **Technologies Used:** Microsoft Azure, PySpark, MySQL, Python, Statistics, Machine Learning Algorithms

**SDE Intern** (*Polynomial.ai*) **Remote, India** 02/2023 - 07/2023

- Worked on a real-time audio-to-text conversion system using Zoom meetings in C++ and Python sockets, resulting in a 90% reduction in latency.
- Created automated test cases using pytest for extracting entities from a query, achieving 80% code coverage.
- Optimized the Entity Extracting model, reducing processing time from 6 seconds to 500 milliseconds, which represents a 92% decrease in time.
- Proposed and built the algorithm and architecture for an efficient recommendation engine for their new e-commerce suggestion business.
- Collaborated with the largest client in the restaurant chain industry for invoice automation and POS data automation using Selenium, which reduced the workforce by 32%.
- Contributed to and increased the efficiency of a Query Parser and Content AI Bot for property description generation by 82%.
- **Technologies used:** Amazon Aws Textract, Tensorflow, Mongodb, python, c++, Django, Flask, Fastapi, Rest Api, Redis

## Achievements

- Ranked **5-star** in the *Tiger Analytics Machine Learning Engineering Program*, excelling in all milestones. [View Achievement](#)
- **144th out of 8,000 participants** in the *Codechef Short Challenge*, demonstrating strong algorithmic skills. [View Achievement](#)
- **Qualified for the Facebook Hackercup**, ranked **1585 out of 34,845**, advancing to the second round. [View Achievement](#)
- In *Google Kickstart*, ranked **1996 in Round F** and **2448 in Round B**, solving complex problems. [View Achievement](#)
- **63rd out of 25,000 participants** in *Codechef Snackdown Round 1* and **1213th out of 40,000** in the qualification round. [View Achievement](#)

- **3.5 stars on Leetcode** with over **1000 problems solved**, earning **10 consistency badges**. [View Profile](#)

## Projects

---

### AI Job Genie – AI-Powered Job Hunting Assistant

Oct 2024 – Jan 2025

**Problem:** Job hunting is tedious and time-sensitive—by the time I found a relevant job, the link had already expired. The manual process of searching, filtering, and applying to jobs was inefficient.

**Solution:** I developed an AI-powered bot that automates **90%** of the job search process by:

- Scraping and aggregating job postings from multiple platforms in real time.
- Extracting and analyzing skills, experience, and preferences from resumes.
- Matching candidates to job descriptions using a **fine-tuned LLAMA 3.2 model**.
- Generating **customized referral requests, cold emails, and cover letters** to optimize applications.
- Storing and retrieving job data efficiently using **Vector Databases and Redis** for fast recommendations.

**Tech Stack:** LLAMA 3.2 (Fine-Tuned), LangChain, Vector Database, MongoDB, Python, Flask, FastAPI, REST API, Redis.

### CANCER DETECTION WITH ESSENTIAL PROTEIN

India 2023

T. Rout, N. R. R. Choudhury, S. K. Panda, A. Mohapatra, M. Kar and D. K. Muduly, "Identification of Essential Cancer Protein in PPI Network Using Graph-Based Approach," 2023 IEEE 11th Region 10 Humanitarian Technology Conference (R10-HTC), Rajkot, India, 2023, pp. 1144-1149, doi: 10.1109/R10-HTC57504.2023.10461935.

## Education

---

### IIIT BHUBANESWAR

Bachelor of Technology in Information Technology

Aug 2019 - Aug 2023 — Bhubaneswar, Odisha

CGPA: 7.82/10

### D.B.M.S English School

ISC 12th Board

Mar 2019 — Jamshedpur, Jharkhand

84.6%

### D.B.M.S English School

ICSE 10th Board

Mar 2017 — Jamshedpur, Jharkhand

90.6%

## Languages
